HARDIK SRIVASTAVA

9548415772 | hardik77.aman@gmail.com | Dehradun, Uttarakhand | linkedin.com/in/hardik-srivastava033 | github.com/Hardboy007

EDUCATION

Bachelor of Technology in Computer Science Engineering | Dev Bhoomi Uttarakhand University, Dehradun Expected Graduation: June 2027 | CGPA: 8.1/10.0

Senior Secondary (XII): 72.8% | Secondary (X): 89.5% — CBSE

SKILLS

Languages: Python, JavaScript, C++

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MongoDB Atlas, SQL, TinyDB

Auth & Security: JWT Authentication, Role-Based Access Control, Session Management

AI & Automation: Groq API, ElevenLabs API, OpenWakeWord, WebSocket, Google Speech Recognition

Tools & Platforms: Git, GitHub, VS Code, Render (Deployment)

Cloud & Deployment (Basic Knowledge): AWS, Docker, PM2, Microservices

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks, SDLC

PROJECTS

PlaceRise - College Placement Management Platform | React 18, Vite, Tailwind CSS, JWT, MongoDB Atlas, Recharts, Node.js, Express.js, REST APIs

Live: placerise.vercel.app

- Built full-stack placement management platform for Dev Bhoomi Uttarakhand University, digitizing the end-to-end placement workflow — previously managed via WhatsApp and Excel
- Implemented JWT-based authentication with role-based access control, protected routes, and first-login password change enforcement
- Built QR-based attendance tracking, automated PDF generation, and email notifications using Brevo API
- Developed analytics dashboards for company-wise placements, CTC trends, and branch-level insights using Recharts
- Led 4-6 member team — defined module ownership, conducted code reviews, managed deployment on Vercel, Render, and MongoDB Atlas

J.A.R.V.I.S – AI Personal Assistant | Python, Electron.js, Groq API, ElevenLabs API, OpenWakeWord, WebSocket, TinyDB, ADB, psutil

GitHub: github.com/Hardboy007/JARVIS

- Built a voice-controlled AI desktop assistant in Python with wake word detection ("Hey Jarvis") using OpenWakeWord, enabling hands-free activation.
- Integrated Groq LLM API for intelligent conversational AI with persistent memory storage using TinyDB
- Implemented real-time Python-to-Electron.js communication via WebSocket to power a live Iron Man–style HUD interface.
- Enabled wireless Android device control via ADB over WiFi with automatic reconnection handling.
- Used ElevenLabs API for natural text-to-speech output and Google Speech Recognition for voice input processing.
- Built real-time system monitoring dashboard tracking CPU, RAM, battery, and network statistics using psutil.

CampusBite - Full Stack Cafeteria Ordering Application | Node.js, Express.js, Firebase Auth, Tailwind CSS

GitHub: https://github.com/Hardboy007/CampusBite | Live: campusbite-1eqe.onrender.com

- Built end-to-end cafeteria ordering system with role-based access for students and staff
- Implemented Firebase Authentication with persistent sessions and role-protected dashboards
- Designed and integrated RESTful APIs connecting frontend to backend; built responsive UI with Tailwind CSS and deployed on Render

---

ACHIEVEMENTS & ACTIVITIES

- Selected to represent college in Smart India Hackathon 2026 — project shortlisted from internal hackathon
- PlaceRise shortlisted for institutional adoption at DBUU — under review to digitize the college's placement process
